

We are a small, but enthusiastic club of 20 members currently. We might be small, but we have great growers who table beautiful orchids every month. Each of our members has, in recent years, developed an interest in terrestrial orchids; and these are tabled regularly.

We haven't had any excursions this year. We are not a large enough club to host an orchid show; but have two in - house mini shows every year. However, we have displayed a table of native orchids at other clubs' shows.
